The Outdoor firepit by Visionline

- Suitable for backyard & patio
- Double walled 304 stainless steel seam welded construction
- Lightweight and portable design

MORE FLAME, LESS SMOKE - the elevated floor and ventilated double wall design makes starting the firepit a breeze. The floor vent holes provides air directly into the coal bed whilst the secondary vent holes at the firepit lip create jets of fire that burn up almost all of the smoke.

PORTABLE AND EASY TO USE - Made from lightweight stainless steel, the Visionline outdoor firepit burns firewood to a fine ash and comes with a full lid to assist in keeping the embers safe when you're finished using it.

Dimensions:

47cm x Ø52cm

Net weight:

19kg (with lid)
